

## NEWSLETTER SOLHÖJDEN JUNE 2017

### PARKING CONTROL

As we're still seeing cars parked on the grass area along the bicycle path, the parking attendants will as of the **1:st of July** start monitoring the whole area and fine any car parked outside the designated spaces.

It's still permitted to drive up to the buildings to load and unload your car, but only on the flagstones by the front door. The same goes for bigger moving vans and similar transports.

### BARBECUE

On Saturday the **19:th of August**, we invite you all to come out and join us in front of number 33 at 17:00. This is an opportunity to be social with your neighbors and meet us in the administrative board. We'll get the grill and you just need to bring your own food and drink.

### BICYCLE PUMP

For those who doesn't already know, we would like to remind you that we have a bicycle pump that everyone can use. The hose is located on the small fence in front of number 35.

### NEW DOOR CODES

As of the 1:st of July the code at the bottom of this page will be used for the front door on your building. The old code will be removed on the 1:st of August.

### PATHWAY

As you've probably already seen, our new pathway behind the buildings is almost complete. It will later be connected to the center of Solbjer and the future tram stop.

As parts of the lawn was also replaced, we would like everyone to avoid walking on the newly planted grass until it has had time to take root.

### CAMERAS IN THE GARAGE

The surveillance system in the garage is being replaced with modern digital cameras to provide better recordings of incidents. This is done in cooperation with Axis who will also use the garage as a test installation for new camera models.

*The administrative board*

*New door codes are only included in the distributed newsletter.*
